

CAPABILITIES

- Okuma Multus B300 II-W 8-Axis CNC Mill/Turn with Edge Rebel 6' Bar Loader
- Okuma LFS15-2SP Twin Spindle 2-Axis CNC Lathe with OGL3F Dual Gantry Loader System
- (2) Okuma Captain L370-BB/MW 6-Axis CNC Lathe with IEMCA Master 880 MP 12' Bar Feeder
- (2) Okuma LB15 II-M 4-Axis CNC Lathe
- DoAll Model NC C-305 Auto Band Saw
- Hyd-Mech Model H-14A Band Saw

ENGINEERING/QUALITY ASSURANCE

- Brown & Sharpe Gauge 2000 CMM
- ST Model 20-3551-00 Optical Comparator
- 12" Mitutoyo Digimatic Height Gauge
- Lot Mitutoyo Digimatic Gauges
- Mitutoyo Model SJ-2-1 Surface Finish Tester
- DP Technology Esprit CAM
- SolidWorks CAD
- Draftsight 2D CAD

Founders Thoughts About AMI

Auburn Manufacturing Inc. was founded in March of 1998. The founder of AMI has forty plus years in manufacturing engineering experience. The heritage of Auburn Manufacturing is built on being a proven, trusted and competent supplier. The success of the company is a result of highly competent multi tasking human resources. The goal of AMI is to exceed the expectations of our customers. Fair pricing, reliable quality, and consistent delivery are givens. Only the best and latest machining technology assets, **Okuma Brand**, are employed to ensure AMI's competitive advantage.

Mission

Auburn Manufacturing, Inc. provides quality metal removal value added capability/ capacity partnerships with local and regional industrial companies. We strive to be *the* competent local and regional supplier of choice ensuring our customers competitive strength while growing and contributing to the community.

Quality

Auburn Manufacturing Provides Precision Machined Parts

**8-Axis Multi Tasking
Mill/Turn Machine**

Full Contouring Capability!

**Resolution Accuracies of
10 Millionths (0.00001")**

**10,000 RPM Milling Spindle
Head for Fine Finish Contouring**

**Big Bore A2-8 Main Spindle
and A2-6 Opposing Spindle
with Bar Loader**

Okuma Multus B300II-W 8 Axis... multi-functional, reduces set-up time, highly accurate with complex applications

Work Envelope:
- Max. Turning Dia. 24.8"
- Max. Turning Length 35.43"

**Equipped with Advanced
Gear Hobbing Function and
Gear Invo-Milling Capability**

State-of-the-Art Equipment

Responsive Service

On-Time Delivery

Prototype - Rapid Prototyping *"From Concept to Production"*

- Complex Parts
- Full Contouring

Proficiency

- Aerospace
- Agriculture
- Automotive
- Heavy Truck
- Medical
- Military
